(Reference #560-006)

The MK484 is a 10-transistor TRF receiver in a 3 pin T092 plastic package. The IC contains a RF amplifier, detector and A.G.C. circuit and requires only a few components to complete a high quality AM radio receiver. ★

Technical specification

Supply voltage 1.1 to 1.6V

Supply current 0.3mA

Input frequency 0.15 to 3.0MHz

Power gain 72dB

Price: (24 or fewer items) £0.50 (Excluding: VAT at 17.5%)**Price: (25 to 99 items) £0.40** (Excluding: VAT at 17.5%)**Price: (100 or more items) £0.37** (Excluding: VAT at 17.5%)**Add To Shopping Cart****TDA7000**(Reference #560-048)**Price: (24 or fewer items) £1.49** (Excluding: VAT at 17.5%)**Price: (25 to 99 items) £1.20** (Excluding: VAT at 17.5%)**Price: (100 or more items) £0.99** (Excluding: VAT at 17.5%)**Add To Shopping Cart****Electron Electronics : Semiconductors - Analogue ICs : Radio ICs**
